AI Product Builder | Building emotionally intelligent AI products, AI companions & rapid MVPs

Greater Antalya

Özet

I build AI-native products focused on emotion, behavior, human interaction, and rapid execution. Over the last few years I've been obsessed with one question: "How can AI products feel less like tools and more like experiences people emotionally connect with?" Recently I built:

- Didn't Happen: An AI-powered anxiety & fear tracking app helping people recognize cognitive distortions, overthinking patterns, and emotional loops.
- Dream Mining: A Jungian dream analysis platform with long-term memory, AI voice interaction, psyche mapping, and emotionally adaptive AI companion systems.
- Vibecoding Turkey: A community teaching people how to rapidly build and launch products using AI workflows and natural language instead of traditional development processes.

My strongest areas:

- * Rapid AI MVP execution
- * Conversational AI UX
- * Emotional AI systems
- * AI companions & memory systems
- * Product thinking + growth
- * Human-centered AI experiences
- * Lean AI workflows & agentic tooling

Currently exploring opportunities, collaborations, and AI startup ecosystems in Bangkok.

Deneyim

Vibe Coding Turkey

AI Product Builder

Ocak 2025 - Present (1 yıl 6 ay)

Turchia

Built and shipped multiple AI-native products focused on emotional intelligence, conversational UX, and behavioral systems.

Projects include:

- Didn't Happen — anxiety & cognitive reframing app
- Dream Mining — Jungian AI dream analysis + AI companion
- Vibecoding Turkey — AI builder education community

Specialized in:

- Rapid MVP execution
- AI product design
- Emotional AI systems
- Conversational UX
- Growth-focused product iteration
- AI workflow automation
